

Dear FCC,

As an Amateur Radio Operator, I am extremely concerned about the Commission's plans to implement Broadband Over Powerlines, chiefly because of the interference that would be subsequently created on the Amateur HF bands. Amateur Radio is a crucial resource for this nation, especially in the wake of disasters, where normal communications are not possible. I urge the Commission to think long and hard about this decision, and the effects it would create. Please do not implement BPL. Thank You.
